

Highly Intelligent Curtain System

In order to improve the working efficiency, it is necessary to create a bright and comfortable environment.

Bintronic's smart curtain will align itself to the best position and effectively decrease the electricity cost caused by indoor temperature variation!

Curtain that Converse

Each curtain supports independent control.

Energy-Efficient Curtain

Each curtain is equipped with a low-power consumption DC motor.

Elegant Curtain

Each curtain can be opened and closed in an elegant pace.

Smart Control

Voice integration for easy and convenient control

- Enjoy comfortable life easily.
- Compatible with Apple HomeKit, Google Home system (RS-485, Bluetooth, ZigBee and Wifi)

Smart Safety

Pull-proof design with smart safety

- If being pulled, the mechanism stops automatically.
- Protect family, surface material, and E&M from damaging.

Energy Saving Eco-friendly

Green building, comfortable and elegant

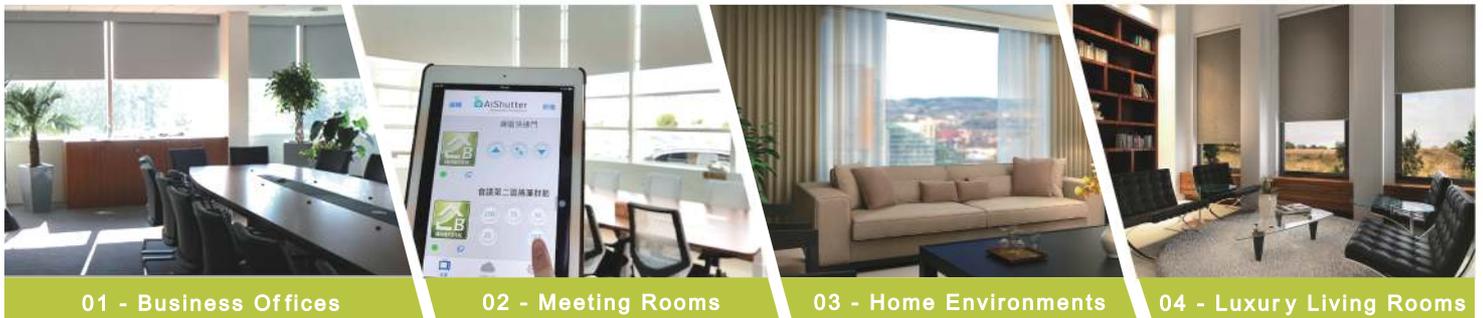

- Power saves up to 25% by adjusting the lighting source.
- DC24V low voltage motor.

Precise Positioning

Accurate analysis of the sun-track system

- Smartly adjust the height of the curtains.
- Control the interior illuminance and temperature.
- Precise positioning without deviation even after prolonged use.

01 - Business Offices

02 - Meeting Rooms

03 - Home Environments

04 - Luxury Living Rooms

Remote control, immediately and conveniently

With remote control, employees can adjust the interior illuminance and the height of the curtains without moving around.

Decide the height of the curtain by yourself

Perfect alignment by segmented positioning. The height of the curtain is accurate without deviation.

Create your own comfortable aesthetics

With the control system, Bintronic will open the curtains for you when you say, "I'm back home," like how you greet your families.

Luxury Living Rooms

Bintronic's smart curtains are compatible with multiple systems. It's easy to control them even if it's your first time.
