

Space Magician for Light Filtering Smart Window Actuator

The Safest Smart Window Actuator

The traditional aluminum window without an intelligent system will tremendously reduce home safety when the concentration of carbon monoxide is too high. Bintronic develops the safest smart window actuator, which could automatically detect the air quality, temperature and humidity of indoor and outdoor and adjust the position angle of the window to make life at home more comfortable and safer!

Breathable

Each window can adjust the in-door air quality automatically.

Safe

Each window equip safe mechanism when operating blocked.

Smart

Each window can easily connect to the smart home system.

Intelligent Sensor

Healthy protection comfortable life

- ▶ Air detection - Detect the in-door air quality (CO, PM2.5...), protecting your health.
- ▶ Comfortable space - Sensing the indoor temperature, moisture and the weather, automatically adjust it to the best position.

Safe Protection

Sensitive device control just one-button

- ▶ Anti-pinch safety - It will stop immediately when the device detect the resistance.
- ▶ Free switching - Easily switch to manual mode when the blackout happened.

Instant Reporting

Smart value added safe environment

- ▶ Instantly check - Controlling & checking the actuator by using smart phone.
- ▶ Safe mechanism - Triggering the security system on necessary to monitor environmental safety.

Easy Installation

Easily install and get start

- ▶ Quick installation without damage the finished decoration, simply install it and the system & device.
- ▶ System integration-Complete integration of the home electric system to accomplish your smart life.
