***A+C**: Full Up To Close Middle & Bottom Rail

1. PAIR SINGLE CHANNEL REMOTE CONTROL WITH MOTORIZED BLIND

a. Power on and connect to motor.

b. <u>Within five seconds of previous step (a)</u>, press **A + B + C + D (E)** <u>at the same time</u>. Release.

c. <u>Within five seconds of previous step (b)</u>, press **A + C** <u>at the same time</u>. Release. Process is complete.

2. SET UP/DOWN LIMITS—MIDDLE AND BOTTOM RAIL

Set Upper Limit—Middle Rail

a. Press **A + SET** <u>at the same time</u>. Listen for **four short beeps** to indicate **setting mode**.

b. Press **A** to raise middle rail. **Long press** continues move; **short click** jogs move.

c. When middle rail reaches desired position, press **B**. *To prevent damage to cord, use **jog move** to reach desired position.*

d. Press **D (E) + SET** to confirm. Listen for **one sustained beep**. Upper limit setting is complete.

Set Upper Limit—Bottom Rail

a. Press **A + SET** <u>at the same time</u>. Listen for **four short beeps**.

b. Press **A + SET** again. Listen for **two short beeps** to indicate **setting mode**.

c. Press **A** to raise middle rail. **Long press** continues move; **short click** jogs move.

d. When middle rail reaches desired position, press **B**. *To prevent damage to cord, use **jog move** to reach desired position.*

d. Press **D (E) + SET** to confirm. Listen for **one sustained beep**. Upper limit setting is complete.

Set Lower Limit—Bottom Rail

a. Press **C + SET** <u>at the same time</u>. Listen for **five short beeps**.

b. Press **C** to raise middle rail. **Long press** continues move; **short click** jogs move.

c. When middle rail reaches desired position, press **B**. *To prevent damage to cord, use **jog move** to reach desired position.*

d. Press **D (E) + SET** to confirm. Listen for **one sustained beep**. Lower limit setting is complete.

If **six beeps** are heard during limit setting, setting mode has inadvertently been exited. Restart section at first step.

After finishing above steps, middle rail will descend to lower limit position.

3. COPY REMOTE (SINGLE CHANNEL REMOTE CONTROL ONLY)

a. Press **SET** on *original* single channel remote control. Listen for **three short beeps**.

b. Press **B** on *new* single channel remote control. Copying will commence.

c. Listen for **one short beep** to confirm completion of program copy. Listen for **one sustained beep** to indicate completion of copy mode.

4. CLEAR PROGRAMMED CODE

a. Unplug motor power. Wait 15 seconds.

b. Reconnect motor power. Within eight seconds, press **A + B + C + D (E)** at the same time.

c. Listen for **one beep**. Within five seconds, press **A + C**.

d. Listen for **one beep**. Programmed code has been cleared.
